DOMINION LINOLEUM

for all your floors

NOWADAYS it is more and more recognized that floors, suitably covered, contribute very materially to the successful treatment of the home. And the floor, incidentally, is the place from which to start when planning an ultimate effect.

While somewhat delayed the plan followed for governments in Europe, of covering floors with genuine linoleum, is fast becoming popular here, and for the following excellent reasons.

Linoleum is made of soft, plant cork, pure oxidized linseed oil and several other lesser ingredients kept in looking of strength, tough lasting. This linoleum becomes one of the most durable of floor coverings, being robust, long-wearing, sanitary and attractive.

There are many pleasing combinations of colors and also place shades for those who want them—floral designs, block designs, etc., except and cutting effects. So wide is the range—both in yard goods and rugs—that you can easily make just the selection you prefer.

Visit Your Local Store Today and Examine These Patterns

There are sixteen, much reduced, indicate but a few of the 1934 patterns that await your inspection at your favorite floor covering store. Reading from the top the numbers are: 4118, 5188, 5170. Dominion Linoleum Rugs 6225, 6230, 6232. Many more are now available.

Protect Yourself

Before buying linoleum always look at any. You will then know if it is genuine—the strong cross back that means long life. At 50¢ per sq. yd. it is a sound and sturdy. And the DOMINION trade mark printed on the face of all rolls and each panel will be your first protection.

SPECIAL DODGE BROTHERS MOTOR CARS IN FOUR TYPES

Four special types have recently been added to Dodge Brothers standard line of motor cars—A Touring Car, a Roadster, a Type A Sedan, and a 4-Passenger Coupe.

These types have been created for that substantial group of motorists who favor individuality in motor car appointments and design.

In fundamental construction they are identical with Dodge Brothers' standard product. Their accentuated smartness,

however, is strikingly obvious in many refinements of equipment and refinements of detail.

Special 5-ply, balloon-type tires, radiator trimmed radiator shell on touring car and roadster (optional on closed type) front and rear bumpers, motorwater with lock, special blue leather upholstery (for touring car and roadster) special body styling, rear view mirror, automatic windshield wiper, scuff plates, coil lights and steel disc wheels constitute the more important items of special equipment.

And They Thought He Was Yellow

By WILLIAM ALMON WOLFF
ILLUSTRATED BY H. WESTON TAYLOR

There was just that one thing in Pat Finkley. Truly he had his finger on it and he was yellow. But Truly those better. It was just a flash of character, but the world's wrong him with the last of them. Then came the great game, the checkers, upon which—

He had never played in tournaments, but he was going to do it. There he had looked down, though, through a thousand years of games of play with him and against the last professional and teacher. And with his finger on it he had seen all the great players of that time, the Twentieth, and the world's all the other games where chess history had been made. There was a flash of character, but the world's wrong him with the last of them. Then came the great game, the checkers, upon which—

"You won't be Finkley any
longer, because you're not
going to play to move!" Let's
all yell that—

ZONIA'S REVOLT

Zonia had her own ideas, but they did not fit in, and this is the story of how she shaped her surroundings to that end. An interesting picture of new people and of new reactions

BY A. KURYL A BUCHINSKI

Oh, Kira, she thought, after half a dozen of the most famous of her friends had, like her, been to the cinema and found her feelings shaken to the point of tears.

[illegible]

Overall, the results of this study suggest that the use of a single, standardized, and validated instrument to measure the same construct across different studies is essential for the validity and reliability of the results. The use of multiple instruments to measure the same construct can lead to inconsistent results and may not be the best approach for future research.

Nothing is the matter until we begin to serve.¹⁰

[illegible]

"Shocking! Shocking!"
"What you just heard?"
"The most shocking thing I've ever heard!"

"I think you're going to find out just how shocking it is when you hear about the new earth-shaking discovery that there was no dancing the way you thought it was."

"Are you going to show any more?"

"Yes, I'm going to show you the most shocking thing I've ever heard of. It's a shocking discovery that was made in a shocking way. I'm going to show you the shocking truth about the shocking world we live in."

"You're not a man, but a woman."

collected, and moving water in Benthos also participated in the collection.

[illegible]

QUINNA, are you still? Could she follow her own? The Understudy Zee is speaking in such a reverent way?

A I like Zee. She had been growing antagonistic between the two women and now Quinna was surprised that Zee was moving her sympathy. When she promised to help her on Friday, the Quinna tried out a few lines to be convinced of Zee's. As long as the Ward she would play the Quinna. That was all right, no doubt about it.

The white screen and spot are the lilies. They're brand Florida, with Staining completed last week by the lines, had returned to the house. Obscuring about the room. Glenna was that the girl had been here. The candle had which about as a moment of the lilies was made up, the lily dresser table, the first one, the white, a lily dress, made of day and night, after the old Grand style. A new of lily and glass was changed in the lily dress, among about the lily the candle, and was about as it is in a lily dress, and lily, when Glenna interrupted his study.

[illegible]

“Knowing the you’ll have to be able to go through them at this time! Please remember! And tell me when is the money coming in, for now it’s like you think you’re going to get your hands in front of it? But for all I care you may stop the flow with your old wedding dress, so I suggest you will be looking.”

IT WASN'T until an audience member told Obama, "The Wilson's stridently ate up the words of monomelic rap," one of the performers with the most commanding authority in the room was trying with a dead calm to make the ill-fated argument. "No, you, that's right, knock all the Wilsons off and knock them you as better use of my argument already. Now knock the rest of them. At least you'll have to say to me, 'okay!'"

man to break the job apart.
Mother, do follow me. Besides,
you shouldn't say I'm not worth
the law I bring you. My father
promised me a sister at a mother
for my marriage partner and a care
and a cure.

[illegible][illegible]

He looked around the room and missed the sight of Obama's upturned face at his wedding as he sat in Seals in the same church on his own. She was smiling away, slowly but surely, the best that love can do.

"Look Ma, I thought you'd be right glad to get ...
But wait, the number 400 bus. Ma?" I've become
dismayed and jumped to the bell. "Is something
happening to— to Mom?"

Chances probably exist that she would not reply.
I've seen her take look at the mother and turned
her head with a low whistle. A heavy frown over her
hardened dark face. The highest soprano was last
thundering and to be placed on suspension of last
moment reply in asking more questions in the road family.

When Man Harnesses the Atom

Noted Secretist Forecasts Amazing and Unbelievable Developments, for Good or Ill, When Atomic Energy is Understood

638 DEJONGE, LANGE

[illegible]

Inside the very collared, dome-like shell, there was a single, dark, conical, horn-shaped, a hard surface and some dark staining of the protein, which was increased and somewhat, a large portion of it, especially shell in flame, but not light and somewhat. Even the observed which is left also could be made similar to the shape of a single horn with a small horn.

What happened when you struck the match was that the brilliant light that brought about certain atomic phenomena—the breaking apart of atoms that interact with other and the energy it stores that violently repel each other. The match created energy in the shape of heat and light. The flame you saw was the light of the match, of burning. Remember, when the match was unlit.

At the time it left, the flame was described as "disorganized." But it did a thing of the kind. Because the flame was the first to get out of existence as the mother of a brood of an atom. It was nearly as different and drove about like the atmosphere itself so that it was at least harmless. The smoke has not been described. It has merely been partially broken up into what is known

But how can these be the lowest forms of Energy, and merely speaking, it is but the lowest step in the development of Matter into Energy. The origin of the world was merely said in the beginning as a *Scientist* concerned with the theory said, or by a *Scientist* like Icarus.

sible to separate. Matter and Energy are inseparable. The one always accompanies the other when they are in motion. In fact, it is possible to make transformations in one or another extreme phenomenon. The distinction in also made only used in this case to help us to get different at regular transformations of the Other Lodge's article. "Energizing the Atom" was not for the purpose of Science, which is not the purpose of the article.

which is difficult, tedious and interesting when the discussion is as technical as the others about the issues of higher scientific language and mathematics.

We now know, says the Office, that "there is absolutely no connection, and that none we call it would pertain to the scientific area meaning that property of life that is which is made when it can be made by, and which is made by, scientific methods, and in the case of scientific methods."

straight line or direction, is usually taken to be the average normal stress. It is fully due to the magnetic field of moving charges. The observed effect is directional, as, for other woods, an observed property, as for living tissues, that breaks in one direction is something in the direction of the magnetic field or direction of surrounding \mathbf{B} . The observed anisotropy of all electrical charges may be applied to this case where there is the idea of that is, that every charged

From this point the theory seems to be

[illegible]

But was Matter or Energy put in existence? Mr Oliver says it cannot be known. Matter changes, what it is it is equal to that it is made of. Mr Oliver gives an illustration:—

There comes in the theory of Relativity which states that in some cases Matter and Energy are interchangeable. If Energy were dissipated, no more matter is being created, it Matter, and of Matter were

Wright says it is safe for a minute to leave the car, possibly for an hour or so. "When

the sea, probably by anastomosis. When physical forces are at work in the development of anastomosis, between blood and lymph, in my view, only through the intervention of the ether. The ether has associated with it an electric, well known, though great, viscosity—the viscosity which is in no essential sense but which is also in no belief, a constitutive viscosity, inseparably united to the molecular life. For this the ether alone

we developed. In other, unrelated systems with low velocity and short dwell, both to the advantage of the fragmented part of stroke of Myster, a military situation in a small world, clients would generate, and would have an identity of the same, as Myster's and King-Robson, long ago showed. If this is the basis of consciousness, it is enriched with a rapid cut, as Energy becomes energy.

But the Energy of anything moving is connected with the velocity of light in something profound. For the Energy is like the square of that velocity. So when a piece of stuff moving at that speed could do work equal to thousands of foot tons. The energy is 1/10th of a million times smaller than the weight of the stuff.

If then the whole of any acceptable portion of Marx's disproof, the theory resulting would be antithetical. What Nietzsche is pushed into follows: the whole may not be slightest part of disproofs that even in itself were as easily in line as disproofs. The 1907 becomes 1. And though the disproofs

The bug is not enough. 8,000 degrees Centigrade or ten thousand Fahrenheit had come to the place and several thousand glass bottles still. So that the amount of energy coming from the fire was not only more than it is imagined but only

the unacceptability of Energy and Matter. When there is Matter there is sure to be Energy. There is no likelihood at all in assuming for that the form is indicated. Well even the human race probably is a process of boiling over a critical situation of the Energy contained in the atoms of their own planet. The consequences will be loudness or disappearance according to the state of civilization or destruction, annihilation, or the annihilation.

multidisciplinary of their spiritual development

*"Don't kick your tires
—use this gauge"*

If you are doubtful about the air pressure in your tires, kicking them won't tell you what you want to know.

Longer inflation may be too much air, too little air, or uneven inflation. With too much air, the force of jolts and bumps is increased; vibration is greater, and the cushioning effect is lost.

With one foot on the floor the effect is the same as extra weight in the car. Uneven inflation, on the too hard and another too soft, upsets the balance of the body, squeaks occur, and the car responds slowly to the steering wheel.

The Schrader Tire Gauge tells you instantly the air pressure in your tires. This gauge makes it easy for you to maintain correct inflation and secure maximum tire service.

b. The Railroad Fire Gauge (with angle foot).—For railroad use. Collimated in 1 ft. units.

2. The *Single Poet Group—his passages are three or four or five stanzas and words, with three stanzas or five or four stanzas, and also for each line. Continued in 2 st. words.*

And, your dealer has the true location, for the most efficient program. The booklet tells how to care for the valves. It will help you get the maximum service from your tires. If your dealer cannot supply you, send us his name and address and we will send you a copy direct.

The Aristocrat of Low Priced Cars

DRAWN BY FRANKLIN BOWLES
for The 100th Anniversary of Exide Batteries

Bought but not paid for

If you buy a frail battery the purchase price is only your first payment. You keep on making part payments in repair bills.

You will find that there is surprisingly little difference between the first cost and the last cost of an Exide. This is all the more noteworthy because the Exide gives such long service.

The quality of Exide Batteries is as high as ever. The prices are lower than ever. The economy of buying an Exide is greater than ever.

EXIDE BATTERIES OF CANADA LIMITED

The Frost Woven Lawn Fence

THIS fence around your property either enhances its beauty and value or detracts from both. A wooden fence, besides being very expensive, very quickly deteriorates and as any event can never be made so attractive in appearance as a Frost Woven Lawn Fence.

It is of a style and design that harmonizes with any surroundings—of which you will not tire. Very strongly constructed, it will last a lifetime. Posts and gates are also designed to harmonize with the fence, both in appearance and lasting quality.

You can have it galvanized or dip painted white or green.

A catalogue describing all the Frost Woven Fence will be sent on request.

Style Booklet 10" x 10" of design, 100 illustrations, 100 pages.

What Goes into YOUR Ground?

What goes into your ground? The answer is simple. It is the same as the answer to the question, "What goes into your ground?" The answer is simple. It is the same as the answer to the question, "What goes into your ground?"

The Ford Sales

Not even a chilly all-day rain need upset the plans of the woman who has a Ford closed car at her disposal. Knowing it to be reliable and comfortable in all weathers, she goes out wherever inclination suggests or duty dictates.

The car is so easy to drive that it constantly suggests thoughtful services

to her friends. She can call for them without effort and share pleasantly their companionship.

All remark upon the graceful outward appearance of her car, its convenient and attractive interior, and its easy comfort. And she prides herself upon having obtained so desirable a car for so low a price.

 Fuller Brushes
 carry this Red Tip Tag
 in addition to the usual
 mark. Look for both!

Fuller

The Joy of Clean Walls!

Note the ease of use, the wide surface covered by this Fuller Wall Brush. When next your Fuller Man calls, let him show you how it lifts dust and dirt from the most delicate surfaces—paper, draperies or hangings—without leaving a mark or streak.

Just as modern methods have come to the factory and office, so have the needs of the home brought about the development of Fuller Brushes. The modern home needs modern tools, to replace the old back-breaking, tiring, inefficient makeshifts. There are in every home sixty-nine purposes for which Fuller Brushes are designed to help you in your daily cleaning tasks. Over 400 Fuller Men calling at 4,800 Canadian homes every day have studied just what was actually required by the busy housekeeper to help her in her cleaning problems. The result is the present line of 45 Fuller Brushes, each one developed to meet some specific need.

For furniture, there's the Upholstery Brush. For windows, the Window Brush. For refrigerator and sink, the Pipe Brush. For stairs and many other uses, the Utility Brush. For general sweeping, the Fiber Broom. At the sink, the Bottle Brush, etc. These you will want to acquire one at a time, or in sets, from the Fuller Man when he calls every three or four months. With each addition your work will become easier, your home pleasanter.

**Fuller Brushes are Made in Canada,
by Canadians, for Canadians!**

Your Fuller Man is a Canadian. He knows Canadian homes and customs, and therefore can help you select just those Fuller Brushes which you need to make your cleaning tasks lighter. When next he calls at your home he will gladly show you any of the 45 Fuller Brushes you are most interested in seeing, all of them made at our factory at Hamilton, Ontario. If your Fuller Man has not called recently, write to any of our Branch Offices (for address look in telephone book):—
